# **Muebles para Laboratorio**

## The Silhouette Style

The Silhouette Style of wood furniture offers a sophisticated, European-contemporary design with radiused edge door and drawer fronts. An integral, recessed pull is machined into the solid hardwood panels, creating a practical and interesting alternative to pull handles.

Silhouette laboratory furniture meets today's quality and value standards. All surfaces are finished with a chemical-resistant synthetic varnish system. The coating withstands reagents and is heat-, moisture-, and impact-resistant.

The Silhouette Style wood laboratory furniture has all the components necessary for a complete laboratory set-up – base cabinets, special-use cabinets, wall storage units, trim parts, and extra shelves.

All wood laboratory furniture is constructed of Appalachian red oak. This premium wood meets the highest standards for wood casework construction and is available in a variety of beautiful, chemical-resistant finishes.

## Features of the Silhouette Collection Include:

- Contemporary (full overlay), Conventional (radiused semi-overlay) and Full Radius styles
- All hardwood and hardwood plywood construction
- A wide selection of door and drawer pulls
- Multiple doweled, glued, and screwed joints
- Standard dovetail drawer construction
- Epoxy-coated 100 pound, self-closing drawer slides
- 1/4" hardboard back dadoed into end panels
- Full depth adjustable shelves
